STAUFF products and services are globally available through wholly-owned subsidiaries and a tight network of authorised distributors and representatives in all major industrial regions of the world.

You can find detailed contact information on the last two pages of this product catalogue or at www.stauff.com.

Please note: Unless otherwise stated, all data and figures in this product catalogue are approximate values and are only valid as references, which are not binding (also in respect to any third parties' rights of protection) and thus do not release the customer / user from checking and testing the suitability of the products for the foreseen purposes. Therefore, data and figures can only be used in a limited sense for construction purposes.

The application of the products is beyond the control possibilities of the manufacturer and, therefore, is exclusively subject to the responsibility of the customer / user.

In the event that a liability is nevertheless considered, any compensation will be limited to the value of the goods supplied by the manufacturer and used by the customer / user. As a matter of course, the manufacturer guarantees the perfect quality of all products in accordance with the General Terms and Conditions of Business and Sale.

Subject to modifications due to the ongoing development and improvement of the products.

With the publication of this product catalogue, previous editions are no longer valid.

For more than 50 years, the companies of STAUFF Group have been developing, manufacturing and distributing pipework equipment and hydraulic components for mechanical and plant engineering and for service and industrial maintenance.

In addition to mobile and industrial hydraulic machinery, typical applications also include commercial and special purpose vehicles, rail transportation and energy technology. Likewise, STAUFF products are used in marine, oil and gas applications and in the process, food and chemical industries.

The overall range currently includes about 40000 standard products as well as numerous special and system solutions according to customer's specifications or based on our in-house development.

All STAUFF products undergo relevant testing in accordance with international regulations and are governed by the high standards of the in-house quality management system. Furthermore, many items have received certifications and approvals from various international institutes, organisations and authorities who have independently confirmed the quality and performance of the products.

Wholly-owned manufacturing, sales and service facilities in 18 countries and a tight global network of authorised distribution partners ensure high presence and service paired with a maximum of availability.

STAUFF LINE Components

With the seven dedicated **STAUFF Line** product groups

- **STAUFF Clamps**
- **STAUFF Connect**
- **STAUFF Flanges**
- **STAUFF Hose Connectors**
- **STAUFF Quick Release Couplings**
- **STAUFF Valves**
- **STAUFF Test**

from own, in-house development and manufacturing, the companies of the STAUFF Group provide a comprehensive range of components for fastening and connecting pipes, tubes and hoses for mobile and industrial hydraulic applications and many other industries.

The portfolio is completed by components for shutting-off, regulating, throttling and measuring fluid media.

In order to perfectly match each other, STAUFF Line products are designed and offered on a high, uniform level of quality. A large proportion of the range made from steel comes as standard with the premium STAUFF Zinc/Nickel surface coating, which is also optionally available for many of the other components.

This coating offers the most reliable surface protection far beyond the previous market standards – even after transport, handling and assembly of the components – and meets all current legal requirements.

If desired, Original Equipment Manufacturers can be supported with value-added services, from **technical consultation to pre-assembly, assembly and kitting** as well as **logistics services**:

- Support with the **selection of suitable standard components** and ordering options; provision of **customised solutions** according to customer's specifications or based on our in-house development – from prototyping to large scale production
- **Analysis and optimization** of existing and design and developments of new systems aimed at increasing the efficiency and performance of machines and equipment and creating value for customers by reducing the total cost
- **Pre-assembly, assembly and kitting** of individual components to customer-specific system modules
- Individually coordinated **procurement solutions** (e.g. web shop and electronic data interchange) and **supply models** (e.g. from warehousing of customised components to Kanban logistics and just-in-time delivery of pre-fabricated system modules to the assembly lines of the customers) aimed at optimising material flows

Aligned with the needs of the market, the product groups

- **STAUFF Test**
- **STAUFF Diagtronics**
- **STAUFF Filtration Technology**
- **STAUFF Hydraulic Accessories**

include a comprehensive range of analogue and digital measuring equipment and devices, filtration systems and replacement filter elements as well as accessories for the construction of tanks, reservoirs, power packs and gear boxes in mobile and industrial hydraulics.

The offer is completed by relevant value-added services:

- Support with the **selection of suitable components** and ordering options; provision of **customised solutions** according to customer's specifications or based on our in-house development – from prototyping to large scale production
- Analysis of existing hydraulic circuits aimed at filtration systems, tank components and monitoring devices that perfectly match to the specific requirements, and developing integrated concepts to increase the efficiency and performance of machines and equipment
- Individually coordinated **procurement solutions** and **supply models**

STAUFF Test

Test couplings from the STAUFF Test product range are already planned in suitable positions in the hydraulic system during the design phase of a machine, or added at a later stage in the course of retrofitting or upgrading.

They allow machine operators and maintenance personnel to easily and safely connect analogue and digital measuring and display devices for the temporary testing or continuous monitoring of system pressure and other factors.

If required, they also allow venting of the system as well as collecting representative fluid samples, e.g. for analysing the degree of contamination of the fluid.

This type of connection requires no tools and can also be carried out during operation under full system pressure up to 630 bar / 9135 PSI (depending on the type of coupling).

The check valve (ball or poppet valve) integrated into the test coupling opens only after connection of the measuring and display device with suitable adapters or test hoses, which complete the product range. This guarantees safe sealing of the connection without any risks of leakages or fluid escaping from the system.

During production, STAUFF test couplings are not crimped after insertion of the internal valve components and seals but rather closed with a threaded nipple in a fully automated process, which secures the proper functioning of the couplings under permanent loads.

The vibration protection feature, which prevents self-loosening of the protective metal cap caused by vibrations in the system, is another competitive advantage.

For the finishing of the test coupling range in carbon steel, STAUFF relies on the STAUFF Zinc/Nickel surface coating which has proven successful for many years. It provides reliable surface protection – even after transport, handling and assembly – and meets all current legal requirements.

Versions in stainless steel V2A and V4A are generally available from stock. Alternative materials and surfaces are available on request.

For selected types and series, independent certificates and approvals can be provided:

- Military approval for use as gas filling valves for nitrogen accumulators by the German Bundeswehr (Wehrtechnische Dienststelle für Pionier- und Truppengerät)
- DVGW registration as test points for gas pressure control systems, issued by the German Technical and Scientific Association for Gas and Water

STAUFF Zinc/Nickel Coating

Layers

- Sealing
- Passivation
- Zinc/Nickel
- Steel

With at least 1200 hours resistance against red rust, the STAUFF Zinc/Nickel surface coating offers excellent surface protection – even after transport, handling and assembly. This was confirmed by testing in the salt-spray chamber according to DIN EN ISO 9227.

Users across all industries and applications benefit from sophisticated technology, which has been developed for and used by the very demanding automotive industry for many years now and that is already the proven standard for a large proportion of STAUFF components since 2007.

- At least 1200 hours resistance to red rust / base metal corrosion under practical conditions in the salt-spray chamber according to DIN EN ISO 9227
- White rust occurs only by way of a slight grey haze
- Surpassing the requirements of the corrosion protection class K5 as defined by the VDMA, the German Engineering Association (360 hours resistance to white rust / 720 hours resistance to red rust)
- Free of hexavalent chrome Cr(VI)
- ELV compliant according to 2000/53/EC (End of Life Vehicles Directive)
- REACH compliant according to 1907/2006/EC (Registration, Evaluation, Authorisation and Restriction of Chemicals)
- RoHS compliant according to 2002/95/EC (Restrictions of the Use of Hazardous Substances)
- Appealing colour scheme with a bright semi-gloss surface finish – comparable to Stainless Steel
- Significantly reduced tendency to corrosion by contact with other metals (such as Aluminium and Stainless Steel)
- Improved abrasion resistance due to the ductility / plastic deformability of the coating
- Little to no risk of triggering allergies – nickel release is down to only a fraction of the statutory limits relating to objects which come into direct and prolonged contact with the skin (independent results of the reference test method according to DIN EN 1811 are available on request)
- Good paint adhesion properties
- Resistance against all commonly used hydraulic media

www.stauff.com/catalogues

The STAUFF online catalogue centre at www.stauff.com/catalogues provides fast and direct access to digital versions of this as well as other STAUFF product catalogues in all available languages.

Online Page-Flip Catalogues

- Easy navigation through index or the powerful full text search functionality
- Contents can be shared and forwarded by e-mail, printed or downloaded and saved in PDF file format
- Also suitable for mobile devices

Download Catalogues

- Download entire product catalogues and save them in PDF file format

Catalogue Request

- Contact form to request printed copies of the product catalogue as well as digital copies on USB stick

The fastest way to the online page-flip catalogue:

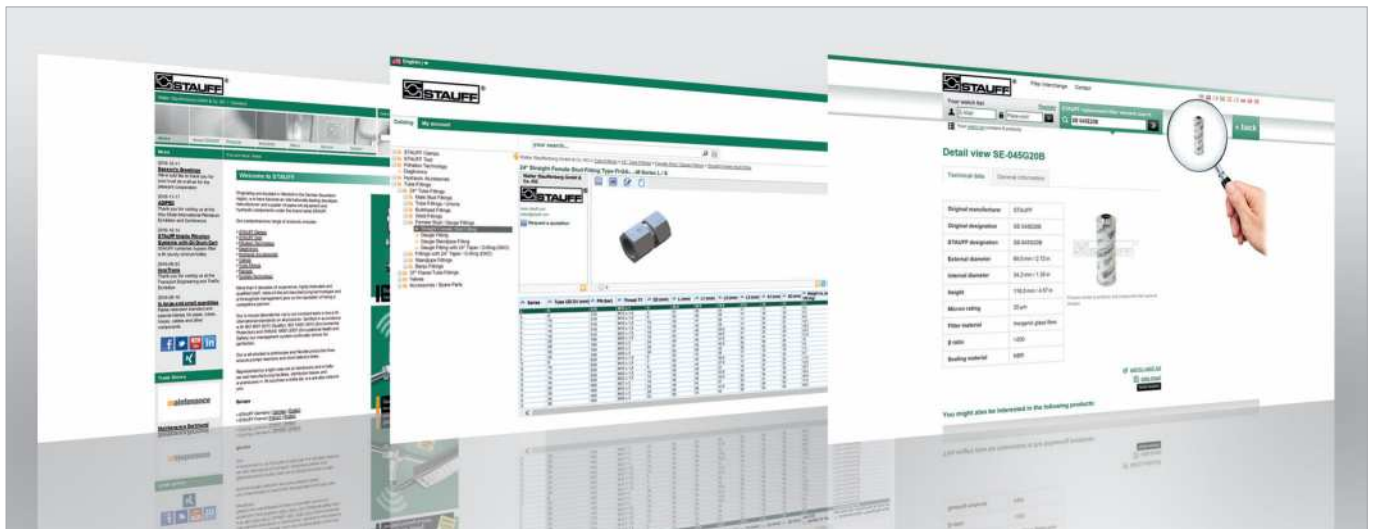

The links that can be found at the bottom edge of all pages of this product catalogue will lead you directly to the corresponding page in the online page-flip catalogue.

In doing so, contents can be searched, shared and forwarded by e-mail, printed or downloaded and saved in PDF file format.

Scan the QR code next to the direct link with the camera of your mobile device* and also use the functions in this way.

Test Coupling with Ball Check
SMK-20

A

Test Coupling with Ball Check SMK-20

A

Fast Coupling for

- Monitoring and control of pressure
- Venting
- Sampling in high- and low-pressure systems
- Connection Thread according to ISO 15171-2

Advantages

- Test system at working pressure
- Leak proof connection before **Ball Check** is open
- Simple connection to measurement, control and switching devices
- Self locking metal protective cap

Working Pressure

- Max. working pressure 630 bar / 9137 PSI
For SMK Type G and K the recommended working pressure of fitting manufacturer should be noted.
- Connection under pressure up to 400 bar / 5801 PSI max.

Materials

- **Metal Parts:**
Standard material: Steel, zinc/nickel-plated = **W3**
Optional:
Stainless Steel **W4** (1.4305 / AISI 303) on request
Stainless Steel **W5** (1.4571 / AISI 316Ti) on request
- **Ball:** Stainless Steel

Seal Types:

B = NBR (Buna-N®)

(Temperature range -20 °C ... +100 °C / -4 °F ... +212 °F)

Note: Internal Seal Types made of FKM, even for standard NBR-type.

V = FKM (Viton®)*

(Temperature range -20 °C ... +200 °C / -4 °F ... +392 °F)

E = EPDM Ethylene Propylene Diene Monomer Rubber

(for Brake fluid,

Temperature range -40 °C ... +150 °C / -40 °F ... +302 °F)

Vibration safety O-ring made of NBR (Buna-N®).

Media

- Suitable for hydraulic oils and other Mineral oil based fluids (Check compatibility of Seal Type material)
- For use with other liquid media please contact STAUFF

Protection Cap

- The complete STAUFF-Test-20-type-SMK range is also available with a hexagonal protection cap made of steel or plastic protection cap.

Test Coupling with Piston Valve
SKK-20

A

Test Coupling with Piston Valve
SKK-20

A

- 1 Internal Seals
- 2 Piston
- 3 Vibration Safety O-ring
- 4 Spring
- 5 Seal at Male Threaded Stud
- 6 Port Connection

Fast Coupling for

- Monitoring and control of pressure
- Venting
- Sampling in high- and low-pressure systems
- Filling of accumulators (special filling-version)
- Connection Thread according to ISO 15171-2

Advantages

- Test system at working pressure
- Leakproof connection before **piston valve** is open
- Simple connection to measurement, control and switching devices
- Self locking metal protective cap

Working Pressure

- Max. working pressure 630 bar / 9137 PSI
For SKK Type G and K the recommended working pressure of fitting manufacturer should be noted.
- Connection under pressure up to 400 bar / 5801 PSI max.

DVGW

- DVGW registration as test points for gas pressure controlsystems, issued by the German Technical and Scientific Association for Gas and Water
- The DVGW approval relates solely to the SKK-12 and SKK-20 series with connection types:
 - M8x1-V-A-DVGW
 - M10x1-V-A-DVGW
 - 1/8NPT-V-D-DVGW
 - 1/4NPT-V-D-DVGW

Media

- Suitable for hydraulic oils and other Mineral oil based fluids (Check compatibility of sealing material)
- For use with other liquid media please contact STAUFF
- In case of ultimate tightness requirements for gaseous media, a special Gas-type is available

Materials

- **Metal Parts:**
Standard material: Steel, zinc/nickel-plated = **W3**
Optional:
Stainless Steel **W4** (1.4305 / AISI 303) on request
Stainless Steel **W5** (1.4571 / AISI 316Ti) on request

Seal Types:

B = NBR (Buna-N®)
(Temperature range -20 °C ... +100 °C / -4 °F ... +212 °F)
Note: Internal sealings made of FKM, even for standard NBR-type.

V = FKM (Viton®)*
(Temperature range -20 °C ... +200 °C / -4 °F ... +392 °F)

E = EPDM Ethylene Propylene Diene Monomer Rubber
(for Brake fluid,
Temperature range -40 °C ... +150 °C / -40 °F ... +302 °F)

Vibration safety O-ring made of NBR (Buna-N®).

Protection Cap

- The complete STAUFF-Test-20-Type-SKK range is also available with a hexagonal protection cap made of steel or plastic protection cap.

Test Coupling with Ball Check
SMK-15

A

Test Coupling with Ball Check
SMK-15

A

- 1 Internal Seals
- 2 Ball
- 3 Vibration Safety O-ring
- 4 Spring
- 5 Seal at Male Threaded Stud
- 6 Port Connection

Fast Coupling for

- Monitoring and control of pressure
- Venting
- Sampling in high- and low-pressure systems

Advantages

- Test system at working pressure
- Leak proof connection before **Ball Check** is open
- Simple connection to measurement, control and switching devices
- Self locking metal protective cap

Working Pressure

- Max. working pressure 630 bar / 9137 PSI
For SMK Type G and K the recommended working pressure of fitting manufacturer should be noted.
- Connection under pressure up to 630 bar / 9137 PSI max.

Materials

- **Metal Parts:**
Standard Material Code: Steel, zinc/nickel-plated, black = **W3**
Optional:
Stainless Steel **W4** (1.4305 / AISI 303) on request
Stainless Steel **W5** (1.4571 / AISI 316Ti) on request
- **Ball:** Stainless Steel

▪ **Seal Types:**

B = NBR (Buna-N®)

(Temperature range -20 °C ... +100 °C / -4 °F ... +212 °F)

Note: Internal sealings made of FKM, even for standard NBR-type.

V = FKM (Viton®)

(Temperature range -20 °C ... +200 °C / -4 °F ... +392 °F)

E = EPDM Ethylene Propylene Diene Monomer Rubber

(for Brake fluid,

Temperature range -40 °C ... +150 °C / -40 °F ... +302 °F)

Vibration safety O-ring made of NBR (Buna-N®).

Media

- Suitable for hydraulic oils and other Mineral oil based fluid (Check compatibility of seal material)
- For use with other liquid media please contact STAUFF

Protection Cap

- The complete STAUFF-Test-15-Type-SMK range is also available with a hexagonal protection cap made of steel.

Note

- On request TEST 15 is also available as SKK-type including "Gas"- and "Filling"-versions.

Test Coupling with Piston Valve
SKK-12

A

Test Coupling with Piston Valve SKK-12

A

- 1 Internal Seals
- 2 Piston
- 3 Vibration Safety O-ring
- 4 Spring
- 5 Seal at Male Threaded Stud
- 6 Port Connection

Fast Coupling for

- Monitoring and control of pressure
- Venting
- Sampling in high- and low-pressure systems
- Filling of accumulators (special filling-version)

Advantages

- Test system at working pressure
- Leakproof connection before **piston valve** is open
- Simple connection to measurement, control and switching devices
- Self locking metal protective cap

Working Pressure

- Max. working pressure 630 bar / 9137 PSI
For SKK Type G and K the recommended working pressure of fitting manufacturer should be noted.
- Connection under pressure up to 400 bar / 5801 PSI max.

DVGW

- DVGW registration as test points for gas pressure controlsystems, issued by the German Technical and Scientific Association for Gas and Water
- The DVGW approval relates solely to the SKK-12 and SKK-20 series with connection types:
 - M8x1-V-A-DVGW
 - M10x1-V-A-DVGW
 - 1/8NPT-V-D-DVGW
 - 1/4NPT-V-D-DVGW

Materials

▪ Metal Parts:

Standard material: Steel, zinc/nickel-plated = **W3**
 Optional:
 Stainless Steel **W4** (1.4305 / AISI 303) on request
 Stainless Steel **W5** (1.4571 / AISI 316Ti) on request

▪ Seal Types:

B = NBR (Buna-N®)
 (Temperature range -20 °C ... +100°C / -4 °F ... +212 °F)
 Note: Internal sealings made of FKM, even for standard NBR-type.

V = FKM (Viton®)
 (Temperature range -20 °C ... +200 °C / -4 °F ... +392 °F)

E = EPDM Ethylene Propylene Diene Monomer Rubber
 (for Brake fluid,
 Temperature range -40 °C ... +150 °C / -40 °F ... +302 °F)

Vibration safety O-ring made of NBR (Buna-N®).

Media

- Suitable for hydraulic oils and other Mineral oil based fluids (Check compatibility of seal material)
- For use with other liquid media please contact STAUFF
- In case of ultimate tightness requirements for gaseous media, a special Gas-type is available

Protection Cap

- The complete STAUFF-Test-12-type-SKK range is also available with a plastic protection cap.

Test Coupling with Ball Check
SMK-10

A

Test Coupling with Ball Check
SMK-10

A

- 1 Internal Seals
- 2 Ball
- 3 Spring
- 4 Seal at Male Threaded Stud
- 5 Port Connection

Fast Coupling for

- Monitoring and control of pressure
- Venting
- Sampling in high- and low-pressure systems

Advantages

- Leak proof connection before **Ball Check** is open
- Simple connection to measurement, control and switching devices

Working Pressure

- Max. working pressure 400 bar / 5801 PSI
For SMK Type G and K the recommended working pressure of fitting manufacturer should be noted.

Materials

- **Metal Parts:**
Standard material: Steel, zinc/nickel-plated = **W3**
- **Ball:** Stainless Steel
- **Strap:** Polyethylene

▪ **Seal Types:**

B = NBR (Buna-N®)

(Temperature range -20 °C ... +100 °C / -4 °F ... +212 °F)

Note: Internal sealings made of FKM, even for standard NBR-type.

V = FKM (Viton®)

(Temperature range -20 °C ... +200 °C / -4 °F ... +392 °F)

E = EPDM Ethylene Propylene Diene Monomer Rubber

(for Brake fluid,

Temperature range -40 °C ... +150 °C / -40 °F ... +302 °F)

Media

- Suitable for hydraulic oils and other Mineral oil based fluids
(Check compatibility of seal material)
- For use with other liquid media please contact STAUFF

Pressure Test Kit (analog) SMB

SMB-20-3-xxx/xxx-W3 or SMB-15-3-xxx/xxx-W3

SMB-20/100-1-xxx-W3 or SMB-15/100-1-xxx-W3

In addition to the individual SPG gauges, the STAUFF Pressure Gauges are also available as a part of a Pressure Test Kit SMB.

The SMB Pressure Test Kits are assembled in various versions, in accordance with customer wishes.

All Pressure Test Kits are supplied in a handy case with custom-designed foam inserts.

Further information on these products and components please see Catalogue 8 - STAUFF Diagtronics.

Note: All test kits are available as SMB-15 version.

B

Pressure Test Kit (digital) SMB-DIGI

SMB-DIGI

In addition to the individual SPG-DIGI devices, the STAUFF Digital Pressure Gauges are also available as a part of a Pressure Test Kit SMB-DIGI.

The SMB-DIGI Pressure Test Kits are assembled in various versions, in accordance with customer wishes.

All Pressure Test Kits are supplied in a handy case with custom-designed foam inserts.

Further information on these products and components please see Catalogue 8 - STAUFF Diagtronics.
